Kitchen Solutions - Accessories

Years of experience, yet still as curious as kids.

At Franke, we have been looking for new solutions and innovations for over 100 years and our attitude still has not changed. In 1911 we combined traditional craftsmanship, precision engineering and a constant pursuit of innovation, three principles that remain at our core.

A story forged in Swiss precision

Our story began at the beginning of the last century as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke. Since then, we opened up to the world and inaugurated manufacturing facilities all around the globe that led us to become leaders in the kitchen sinks segment, and home solutions altogether.

“We believe that sustainability means fairness to future generations”

Shaping our future

Preserving the environment, shaping the future.

As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a liveable future where people can also thrive.

“We believe that sustainability means fairness to future generations” – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on the three pillars of the environment, employees and the company. When it comes to environment, we focus on the production and lifecycles of our products.

As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades – conserving resources in the process.

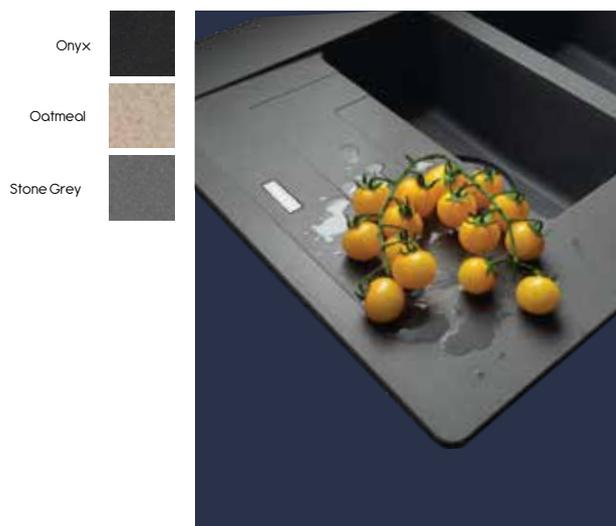

We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren't just empty phrases to us, they're deeply embedded in our company's DNA.

We help people to stay healthy and to make their professional aspirations a reality.

Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Show what you're made of!

Shiny or matte; smooth or stone-like, extra-strong or super trendy. Your kitchen can speak volumes about you, so every detail counts. To offer you the chance to create your very own perfect kitchen, our range of materials is designed to please any taste, match any style and resist any endeavor. Discover each material's precision-engineered character and unique benefits to choose the one that suits your needs

Fragranite

An exceptionally tough material, highly resistant to burns, dents, chips and stains. Pioneered by Franke, it's a unique material with a subtle sheen that is warm to the touch thanks to its 80% of granite. Also, Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%. A more than relevant feature for our kitchens, as bacteria can multiply every 20 minutes making the kitchen's surfaces highly unhygienic.

Tectonite

Heat, shock and impact don't scare our Tectonite. Sturdiness combined with unique design freedom makes Tectonite sinks the ultimate choice for hardworking, stylish kitchens. New technology represents a giant leap forward for synthetic materials, whilst allowing for exciting minimalist designs in a new plethora of trendy colours.

Carbon Black

F-Inox Technology

An exclusive Franke coating able to group water molecules and allowing you to dry your sink without ring stains. Water repellent and scratch-resistant, this futuristic coating also fears no heat up to 350°. A real and long-lasting beauty formula that you can appreciate from our Masterpiece family.

Stainless Steel

Whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a Stainless Steel solution for you. Any Franke Stainless Steel product is made from premium quality chrome nickel steel, which looks stunning and is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake, or break. If Stainless Steel is one of the most popular materials in the kitchen, it's for good reason.

PVD Coating

PVD, standing for 'Physical Vapor Deposition', is a coating technology that makes tapware even more resistant to abrasions, scratches and corrosion and offers exceptional aesthetic features as well. A tap treated with a PDV coating even resists UV rays and makes fingerprints less visible in a busy kitchen. Available in different finishes, with chrome remaining the most popular, there are now an array of other stunning finishes to choose from. From solid stainless steel, which combines beauty with durability, brass and gunmetal to Industrial Black, Copper and Gold, you really can find something to suit every style of kitchen.

AUSTENITIC STAINLESS STEELS (SS 304 - AUSTENITIC GRADE)

All Franke Stainless steel sinks are manufactured using only SS 304 Austenitic grade. Austenitic stainless steel are chromium & nickel containing stainless steel with very low carbon content. Austenitic 304 stainless steels formed through the generous use of austenitizing elements such as nickel, manganese and nitrogen. Chromium content is range of 18% and nickel content in range of 8%. They are non-magnetic but can become slightly magnetic when cold worked. Cold working also enhances their strength. Austenitic stainless steel have mechanical properties over a wide range of temperatures. In addition, these steel are easy to clean, which enhances their use in applications in hygienic and sterile environments.

Quality in shining armour

Beautiful and made for real-life use. Steel represents our kitchen ideal.

The sheer quality of Franke products can be seen and felt. We use AISI 304 18/8 steel, which is produced in Italy and Europe: a choice that reflects our dedication to quality, one of our core priorities over the 100-plus years of our history.

Strong and robust, it maintains its brilliance over time, making it the defining feature of the living spaces in which it is installed.

Its superb technical features ensure that it is always in demand, and highly appreciated by professionals in the haute cuisine sector: furthermore, stainless steel is an extremely hygienic material, and is easy to clean and recyclable. Aesthetically pleasing and functional to use: stainless steel really represents quality in shining armour.

Durable

The specific concentrations of nickel and chrome in AISI 304 18/8 steel render it particularly resistant to extreme temperatures. Its brilliance does not fade over time; on the contrary, its beauty and appeal only increase.

Easy to maintain

Steel is easy to maintain; just a few simple daily steps ensure that it remains a joy to use over time. Skip to the next page for tips on how to take care of Franke steel.

Functional

Steel is the material of choice for kitchen professionals, due to the fact that it is resistant, hygienic and safe. Its non-porous surface is extremely easy to clean.

Sustainable and ecological

An environmentally friendly material that is 100% recyclable, can be sourced from scrap materials, and produced without toxic waste.

Inspirations

There is no place like home. And there are no two homes alike. The way we cherish our own nest is just as unique as we are, each one with different tastes, preferences, and needs. To help you get inspired and create the kitchen environment of your dreams, and enjoy it every day, we developed three different **families** of products.

Mythos

A passion for the best

Our most premium range. Technology meets design, while even the smallest details are carefully sought-after. This **family** sets its goal to the highest levels, combining the very essence of functionality with that of beauty.

Maris

Family in the kitchen

A family inspired by families. Cosy and functional, for savouring the heartwarming experience of a **family** get-together. Maris' philosophy is simple: welcome anyone, anytime with the pride and joy of a homemade dinner.

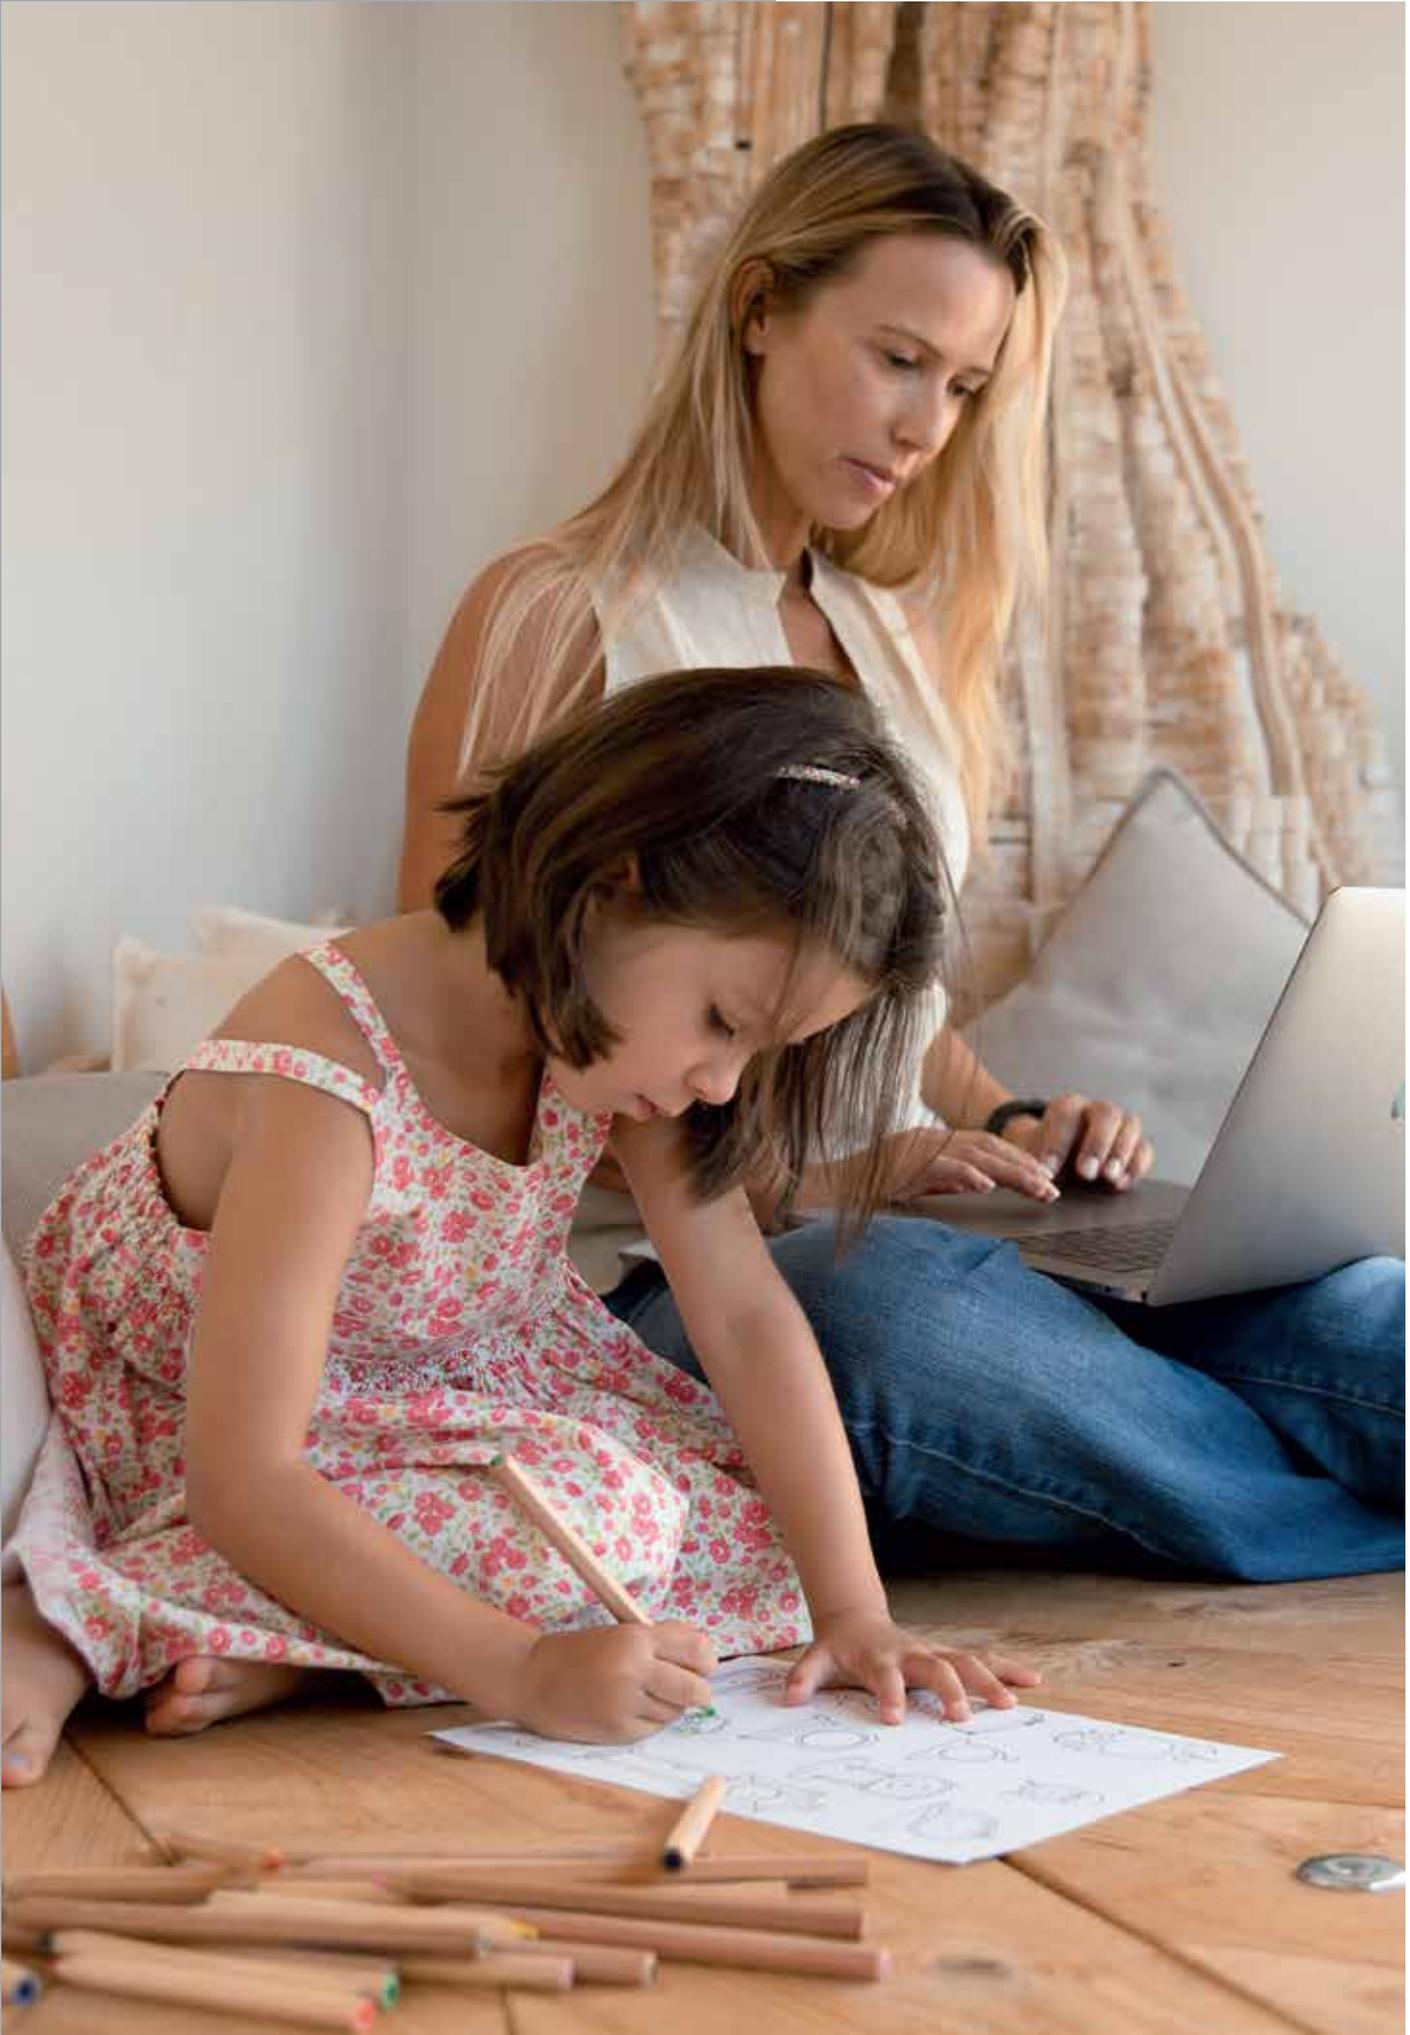

Smart

Straight to what matters

The simplest things work the best. Essential in its perfection, to jump to what matters the most: bringing joy to your kitchen. A **family** created to fulfill any need and preference.

What will your kitchen look like it's up to you, but whatever your way of bringing joy home, **you can count on us.**

The top of Assistance, if ever needed.

A 360° guarantee on the entire family

All of our products are meant to be of the highest quality.
That is why it is unlikely you will ever need our Assistance, but if you ever would,
we will be there for you in an instant and ready to help.
Our exclusive warranty also extends to sinks and mixers
in addition to the classic coverage provided on household appliances.
An important initiative in the sector that makes after-sale service
more and more complete and structured.

Customer Care and Technical Assistance

To report any problems with Franke Product please contact Customer Service 1800 209 3484

The Franke Service Centre will be available to solve any technical issue and restore
the conformity of the product as per terms and condition of warranty.

Sinks

Kitchen sinks that feel tailor-made

The first creations were made from stainless steel. Today Franke's catalogue range has shapes and sizes for all, which covers everything, from the new trends to traditional favourites. All you have to do is pick the one that best complements your cooking style, your lifestyle and your personal style. You'll find nothing but elegant design and exquisite craftsmanship on every style of sink.

Stainless Steel Sinks

Franke stainless steel sinks are made from premium quality 304 stainless chrome nickel steel. Stunningly beautiful, highly resistant to stains, rust and corrosion - plus, it won't chip, craze, flake or break.

Franke offers sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of a polished finish or the subtle matt sheen of a silk or brushed finish, there's a stainless steel solution for you.

Fragranite Sink

Superbly hard-wearing, sinks made of granite are particularly elegant and bring a natural look into your kitchen.

Our processed granite has a subtle shine and feels warm to the touch. The surface is finely textured but not porous, ensuring a high standard of hygiene. Treated with Sanitized® surface of our sinks can reduce bacteria and microbe growth by 99%, and also make them so easy to clean.

Choose Your Perfect Sink

The kitchen sink is seen as the heart of the kitchen, let your imagination run free with a range of options to help maximise space and accentuate the look of the room. The following information will help to ensure that your ideal sink is the perfect fit for your kitchen.

Choosing Your Perfect Sink

There are a number of considerations to take into account when choosing a sink. Not only how it'll accentuate the overall look and feel of your kitchen, but also how well its installation and functionality work for your lifestyle.

1. Material Options

- STAINLESS STEEL
- FRAGRANITE
- TECTONITE

2. Installation Type

- INSET
- FLUSHMOUNT
- UNDERMOUNT

3. Number of Bowls

SINGLE BOWL sinks come in a variety of sizes ideal for limited space or large spaces.

DOUBLE BOWL sinks offer great flexibility in the kitchen, providing more space, with additional options.

4. Cabinet Size

The length and depth of the cabinet, on top of which the sink will be located, are the factors that determine the maximum size of an installed sink.

5. Bowl Depth

A deeper bowl can make it easier to handle large pots and cookware, but the user's height should also be considered. A shallower bowl may provide greater comfort while working in and reaching the bottom of the sink.

Installation Type

 **INSET** the most popular installation option: practical and easy.

 **FLUSHMOUNT** a sophisticated design that enhances the look of the worktop.

 **UNDERMOUNT** an original, refined choice that allows sinks to be installed underneath worktops, creating a surface with immaculate lines which is highly functional, elegant and easy to maintain.

GREAT MEALS, NO INTERRUPTIONS IT ALL COMES TOGETHER WITH ALL-IN

Transforming your sink into a stylish and playful workstation, All-In is the flexible food preparation system designed to bring more flow to your kitchen and life.

reddot winner 2022

Eight accessories, endless uses, fits any sink*

*Up to 540mm

Prepare

Using the bamboo board, telescopic bridge, strainer and collector bowls, All-In can help you:

- Chop vegetables and other ingredients
- Collect the cut food
- Collect peelings and deal with waste
- Store prepped ingredients in the fridge

Cook

The bridge, strainer bowls and foldable pad are really useful at the cooking stage and you can:

- Rest pots and pans on the bridge while filling them from the tap
- Use the strainer to drain pasta, or other ingredients
- Stand hot pans and dishes on the foldable pad to protect work surfaces

Clean

When it's time to wash up, the bridge, strainer bowls and foldable pad can also help you to:

- Drain glasses and dishes
- Drain cutlery and cooking utensils

Tidy

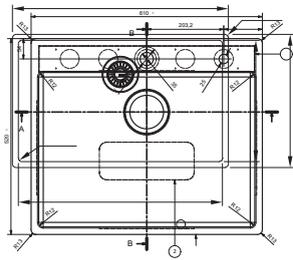

Once the washing up is finished, All-In can still help you to tidy everything away, whether it's to:

- Store cleaning items in the sink
- Keep all accessories together in the storage box
- Put everything away neatly in your kitchen cabinets

Neptune

Microdecor Finish

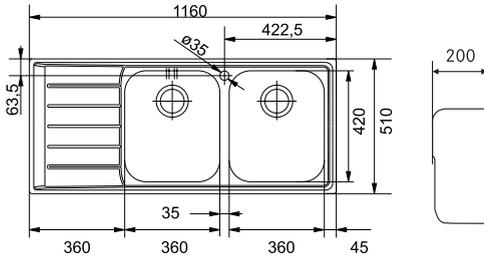

Microdecor Finish

The distinctive pattern of Microdecor Steel is so light as to be almost invisible, recalling the effect of aluminum and giving the steel a unique, inimitable appearance. Any scratches only damage the tiny convex areas of the surface, while the imperceptible concave zones prevent the formation of visible marks.

Flush Mounted

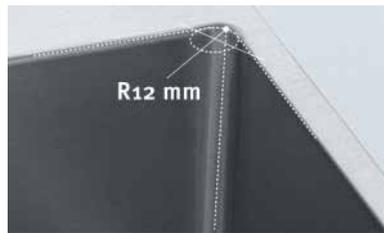

BOX CLASSIC

INSTALL PERFECTION IN A MOMENT

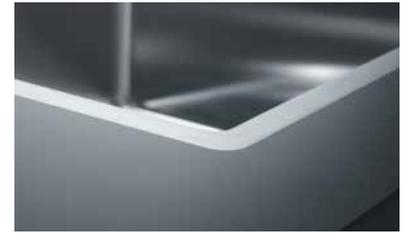

A Red Dot award-winner for best-in-class design, the Box range of sinks helps you get the job done simply and with style.

- Easy to install as a built-in sink, slimtop or undermount
- Premium quality stainless steel. High stain and corrosion resistance

Features:

R12 mm Radius, Free from sludge deposition.

Seamless Rim with Elegant match to counter top.

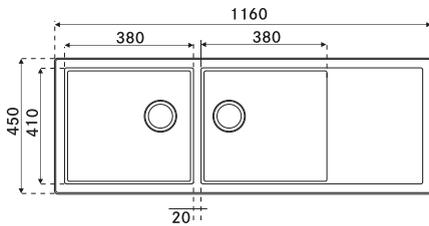

Suited for Under Mount also

All Franke stainless steel BOX or Square are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacturing. The grey dynaphon spray also insulates, minimizing heat escaping from the bowl, keeping water warmer for longer.

Taps worth talking about.

From satin nickel to polished chrome, from classic style to modern design, from brass to stainless steel.

With top material, extraordinary design, high quality components, and exacting manufacturing processes, Franke tap range meets every need in every kitchen.

Design

Franke's line of kitchen taps perfectly captures all the elements of today's design choices – traditional, transitional and contemporary. With everything from top flight European models with a sleek minimalist line, to sumptuous classic models that are the centerpiece to any kitchen, the addition of a Franke tap can reinvigorate an existing kitchen or make a statement all its own in a fresh design.

Manufacturing

Outstanding design and quality components come together beautifully during the Franke manufacturing process. Strict adherence to Franke manufacturing standards in forming, finishing and final assembly achieve the exceptional quality and durability that makes a Franke tap one of the most desired additions to a kitchen.

Hygiene

Superior materials with corrosion resistant and easy-cleaning features guarantee that no harmful materials enter the taps' flow of water.

Durability

Scratch and acid resistant features of high quality SUS304 stainless steel ensures our tap have a much longer lifecycle.

Functionality

Ceramic cartridges provide uniform temperature and water flow transmissions, as well as superior water-saving capabilities.

Design Award

Thanks to its outstanding quality and cutting-edge design, many of Franke taps received awards for innovation and design.

KITCHEN FAUCETS

Body Material

Bronze (59%- 63%), low lead content (0.8% - 1.6%) low residue (<1.5%) – gravity casting or low pressure casting. Most products in the market are sand cased with lots of pinholes and uneven body thickness.

Electroplating

The thickness of the nickel plating is more than international and European standards and more corrosion resistant than others.

Surface chrome plating thickness for Nickel and Chrome

| | | |
|-------------------------------|-------------------------|--------------------------|
| Franke | Nickel > 7.5u | Chrome >0.25 u |
| International Standard | Nickel > 5 u | Chrome > 0.1u |
| EN 817 / EN 200 | | |

Cartridge: German Ceramic Cartridge and Longer Life.

Flexible hose: Spanish S/S 304 exible hose, pressure resistant and corrosion resistant.

Aerator: Using top grade Aerator, integrating water saving and water flow.

Fasteners: All using Stainless Steel.

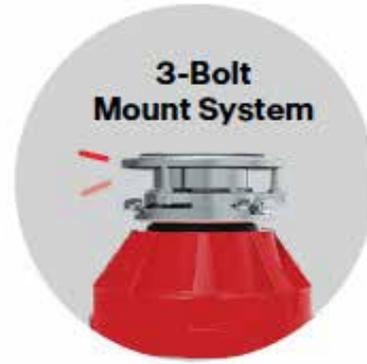

Disclaimer : Inlet pipes supplied with the product are of standard size, may vary from product to product. Check before purchase if any.

Waste Disposer

Cleaning up after meals is about to get a whole lot easier with a Franke waste disposal unit. Food scraps are safely and hygienically washed away. Smaller, lighter and with superior performance, Franke units are the ultimate kitchen companion.

Torque Talk

Permanent magnet motor

Clocking in at 2,700-2,800RPM, the high speed and torque (twisting power) produced by the permanent magnet motor of the Turbo Elite series food waste disposer is almost twice as fast as standard induction motor units (1,400RPM), eliminating any potential jams.

Torque master grinding system

Utilizing balanced turntables, armatures, and corrosion-proof components, this system provides a quieter operation, less vibration, a longer lifetime, and faster grinding of food waste – which means less time spent at the sink.

Here to Stay

3-bolt mount system

Cut down the time needed to get your Turbo Elite series food waste disposer up and running with Franke's new 3-bolt mount system. Requiring only a screwdriver, the system makes for fast, easy and economical installation.

Corrosion resistance

By utilizing superior polyamide for hoppers, a synthetic polymer for drain housings, and stainless steel grinding components for all models, Franke's food waste disposers are uniquely protected against the risk of corrosion, allowing for a longer service life.

Magnetic Magic

Energy saving

Requiring less electricity than induction motors, Franke's permanent magnet motor also saves on water thanks to its faster grinding speed.

Less is more

The permanent magnet motor maintains the same power output as an induction motor, while its smaller footprint saves space under the sink and makes for easier installation.

Clean Slate

Bio Shield

Franke's food waste disposers feature Bio Shield anti-microbial agents permanently molded into their internal "wet" components to guard against odor-causing bacteria growth.

Removeable splashguards

The removeable splashguards make it easy to clean or replace – a feature that is often lacking in other brands. Users can also remove the splashguard to quickly dispose of large batches of food waste.

Clean up after mealtimes as skillfully as you prepare them thanks to the new Franke Elite Slimline range of food waste disposers. Each is designed to be a daily family assistant, helping to manage food waste easily, reduce risk of germs and odours, and offer a more sustainable approach to everyday kitchen life.

A powerful performance

Thanks to innovative Twist Force technology that offers exceptional grinding power, you can expect fast and efficient results without jamming. A hygiene safeguard also fights against the growth of bacteria and unpleasant odours with its antimicrobial protection.

Details that deliver

Each waste disposer features a high-flow splash guard ensuring the grinding chamber is left clean, Sound Soft Technology for noise reduction, and a strong Magnetic Rim on selected models to attract kitchen utensils and other miscellaneous metal objects.

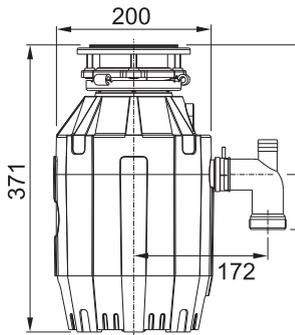

Elegance under the sink

Thanks to a 3-Bolt Mounting System that makes it compatible with all Franke sinks and bowls that feature a 3 1/2" waste hole, and an elegant-shelled body which is designed to save maximum space underneath the sink, each Elite Slimline Waste Disposer is a refreshing piece of Franke innovation that is a welcome addition to any kitchen.

TE-1.25 HP

MARIS

FUN Number: 134.0473.237
MRP: Rs. 27,590

Product Features:

- 1400ml large capacity can process more food waste at once
- Stainless steel grinding system and components ensure powerful and stable grinding
- 1.25Horsepower Dura-Drive DC motor provides strong torque output and high speed, eliminating potential jams
- Compact design and light weight save space under the sink with easier installation
- Overload function & blade-free design guarantee safe of use
- Air switch for safely control and easy installation
- 3 bolts all-metal mounting system for easy installation and stable performance
- Sound insulation system make it operate quieter
- Removable splashguard for easy cleaning and replacement

BIO WASTE DISPOSER 0.5 HP/0.75HP/1.25 HP

INTRODUCTION

Franke “Turbo Elite” Waste Disposal Unit is designed to free the kitchen of unsightly and unhygienic household waste and is the essential add-on for ensuring that your kitchen remains looking immaculate.

Thanks to a permanent magnet motor, Franke WDUs reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

Includes integrated Air Switch. Includes antibacterial protection for odour control.

This is a slim line model ideal for fitting into 1.5 bowl sinks where space may be limited.

ADVANTAGES

1. MOTOR

Due to the high speed and torque (twisting power) of the permanent magnet motor, most potential jams are eliminated.

A common problem with induction motors is that they have a starting winding and running winding. When the disposer is used improperly, i.e. food waste being deposited before starting the disposer, it is up to the starting winding to overcome the load on the turntable.

This often results in jamming since the starting winding does not have the torque necessary to overcome many jamming situations.

The Permanent Magnet Motor used in the Bio Shield Series disposer reaches full torque on the initial revolution, therefore avoiding the jamming situations as mentioned above.

TORQUE MASTER

Features Balanced turntables and balances armatures as the heart of the system. This along with corrosion proof components provide for less vibration.

2. BIO SHIELD

A Unique Antimicrobial agent is permanently molded into the “Wet” components that helps prevent bacteria-caused odors.

It also inhibits the growth of a wide range of microorganisms.

3. BUILT-IN AIR SWITCH

This model features a Built-In Air Switch Power Option. Turn on your disposer by the power switch or by pushing a button that creates air pressure to turn on disposer. Great option for use with islands.

4. Corrosion Proof

The Number One cause of failure for our competitors’ disposers is corrosion. Corrosion can cause leaks, jams, and allows bigger food particles through holes enlarged by rusting, which can cause clogging of the drain pipes.

Our all “Turbo Elite Series” models have stainless steel metal grinding chamber parts (turntable, swivel impellers, and the grind ring). This makes the Turbo Elite Series disposer corrosion proof.

FRANKE

India Regd. Office:

FRANKE FABER INDIA PVT. LTD.

Gate No.: 1086 / 1 / 2, Nagar Road,
Sanaswadi, Tai Shirur, Pune - 412208,
